16 March 2022.

Good Day

FIA T1 TYRES

It has been brought to our attention that there is a dire shortage of BF Goodrich tyres for Class FIA T1.
As per the FIA T1 regulations, Tyres are free.

Art 8. Wheels and Tyres

Only wheels made from aluminium alloy and weighing more than 13 kg are authorised for 4x4.
Complete wheels must be housed within the bodywork (cf. Article 3.1), and must have a maximum diameter of 940 mm for 4x2 and 810 mm for 4x4.

The diameter must be measured on the new tyre specified by the manufacturer at a pressure of 2.5 bar R (relative).

The use of tyres intended for motor cycles is forbidden.

The fitting of intermediate parts between the wheels and the tyres is forbidden.

The wheels do not have to be of the same diameter.

Should you not have sufficient stock of your preferred tyre, you are free to buy and fit what is currently available.

We will not be entertaining any requests for dispensation to ask competitors who have stock to invest in an unnecessary expense.

Tyres for class T remains as per Commission Approved list.

Kind regards

Archie Rutherford.
